### Spotlight on the 0655-H HPT

- This hydrostatic test unit allows the user to test line pressure on a system up to 580 Psi.
- The user is able to pump water into a closed pipeline system, set and lock the pressure, then test to see if there are any leaks in the pipeline system. Ideal for contractors and plumbers.
- This unit provides an easy to use front facing control panel.

#### Features:

- Stainless Steel frame
- Exclusive water gauge design
- High Capacity (5") water filter
- AR Diaphragm Pump
- Stainless 10 Gallon Water Reservoir Tank
- Easy Read Control Panel

Performance:  
Pressure: 435 Psi  
Flow: 50 l/min.  
Power: Petrol 5.5Hp Honda

**Trade Price: \$8,832**

Our range of hydro testers are designed for the contractor who needs a reliable, high quality, high flow/low pressure machine.

Supplied standard with:

- Comet Diaphragm pump manufactured in Italy
- Enclosed gear box
- Double pressure gauge and lock off ball valve system
- Roll frame with 4 pneumatic tyres
- Inlet water filter

Applications include:

- Pipeline pressure testing
- Leak detection
- Hydrostatic testing of pressure vessels

Optional equipment:

- NATA certified pressure gauges
- Electric start petrol engines
- Skid Mount Units
- 600 Litre poly water tank on skid mount units
- 2000Psi to 7250Psi (140-500Bar) units built to your needs

Separate hire company specifications available.

\*\*\*Buyers Note: These are high flow units. It is important to consider how to feed enough water to the machine\*\*\*

### About the Dual Valve System

All hydrostatic pressure test units are fitted with a dual valve system. This isolates the pressure pump from the item under test when the test pressure is reached.

When isolated the test piece is monitored during the test period on the second pressure gauge for any pressure drop, which would indicate a leak.
